Pinspotter/Pinsetter

MaskMatrixP3

Universal - for all Pinspotters and Pinsetters

Document rev 23 MAY 2023

MaskMatrix RGB LED Display for Mask Unit

Capable of displaying: Lane Number in multiple menu selectable colours and formats
1st Ball
2nd Ball
Strike
Foul
STOP
(if the Pinspotter or Pinsetter has the correct outputs available)

1/2 Ball indicator at LEFT

*SOME EXAMPLES
OF OPTIONS AVAILABLE
FROM THE MENU
SEE PAGE 11*

1/2 Ball indicator at RIGHT

Product Features

- * Works on all Pinspotter and Pinsetter models
- * Display lane number while machine is OFF (if optional plug pack is used)
- * Use menu buttons on rear to set:
 - lane number
 - lane number colour for "machine ON"
 - lane number colour for "machine OFF"
 - set 1st and 2nd Ball indicator format and colour
 - set STRIKE colour
- * Dedicated inputs for:
 - Machine power
 - 2nd Ball
 - Strike
 - Foul
 - STOP

MaskMatrixP3

Universal - for all Pinspotters and Pinsetters

AMF 82-70 Pinspotters

Press * to enter menu mode

← Menu + button

← Menu Select button

← Menu - button

To exit menu keep pressing * until you see the standard display

Connector to LED Panel

*** OPTIONAL ***
 Power in from 12Vdc 2A plug pack
 If used, this will allow unit to show lane number even while machine is off

Fuse 1A Fast

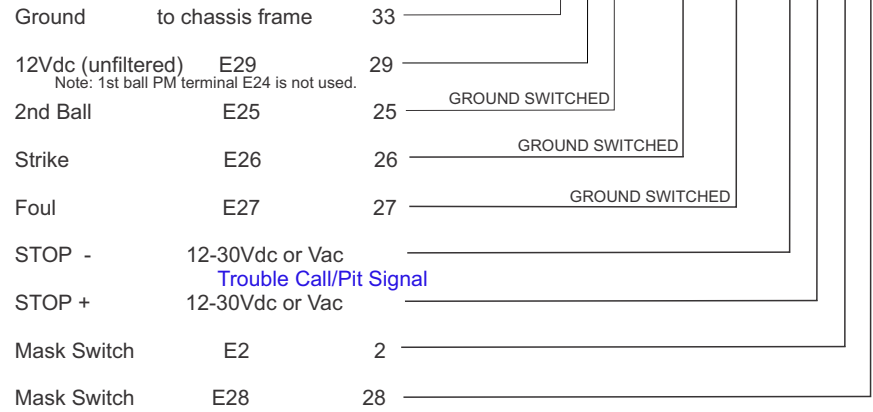

Circuit Isolate Switch

Switch ON (up) where 2nd Ball and/or Strike and/or Foul use the same power supply as the main Ball Light Power (most machines) (circuits switch to GND)

Switch OFF (down) where 2nd Ball and/or Strike and/or Foul are separate two-wire circuits

Chassis PM Plug type

	ELCO	CPC
Ground	to chassis frame	33
12Vdc (unfiltered)	E29	29
Note: 1st ball PM terminal E24 is not used.		
2nd Ball	E25	25
Strike	E26	26
Foul	E27	27
STOP -	12-30Vdc or Vac	
STOP +	12-30Vdc or Vac	
Mask Switch	E2	2
Mask Switch	E28	28

Very important - this wire must be connected to chassis ground. On CPC chassis, it may be possible to use a spare terminal for ground - for example, 33.

MaskMatrixP3

Universal - for all Pinspotters and Pinsetters

AMF 82-90XL Pinspotters

Press * to enter menu mode

← Menu + button

← Menu Select button

← Menu - button

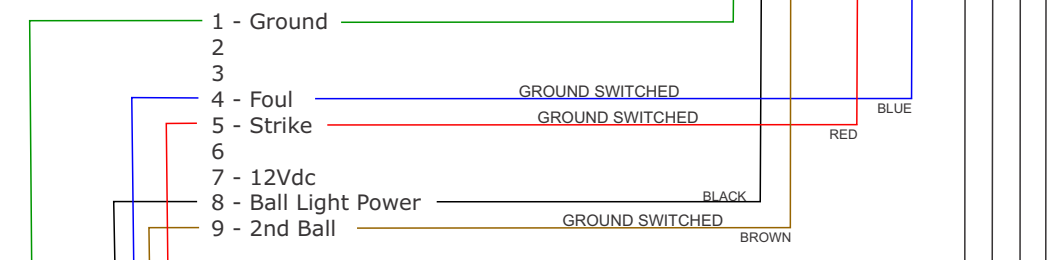

To exit menu keep pressing * until you see the standard display

Connector to LED Panel

*** OPTIONAL ***
 Power in from 12Vdc 2A plug pack
 If used, this will allow unit to show lane number even while machine is off

Fuse 1A Fast

Circuit Isolate Switch
 Switch ON (up) where 2nd Ball and/or Strike and/or Foul use the same power supply as the main Ball Light Power (most machines) (circuits switch to GND)
 Switch OFF (down) where 2nd Ball and/or Strike and/or Foul are separate two-wire circuits

CS-M05-ID9 Interface Cable
 (available separately)

Fuse 1A Fast

Circuit Isolate Switch

Switch ON (up) where 2nd Ball and/or Strike and/or Foul use the same power supply as the main Ball Light Power (most machines) (circuits switch to GND)

Switch OFF (down) where 2nd Ball and/or Strike and/or Foul are separate two-wire circuits

QAMF Part # 088-000-017 Mask Signal Cable
 Connects XLi chassis to 2 x D9 female.
 The pinout of each D9 matches XL type chassis and QAMF # 090-005-750 Mask PCB.
 Left lane D9 only shown in this diagram.

12 Vdc on this connector is from the logic supply. The GND connections are looped through the 'Spare Relay' connector so the mask LEDs will switch On & Off with each machine.

NOTE:

Some XLi
 Are set up to do 1st Ball, 2nd Ball, X, F
 090-005-750 LED Mask Board
 088-000-017 Cable Assy

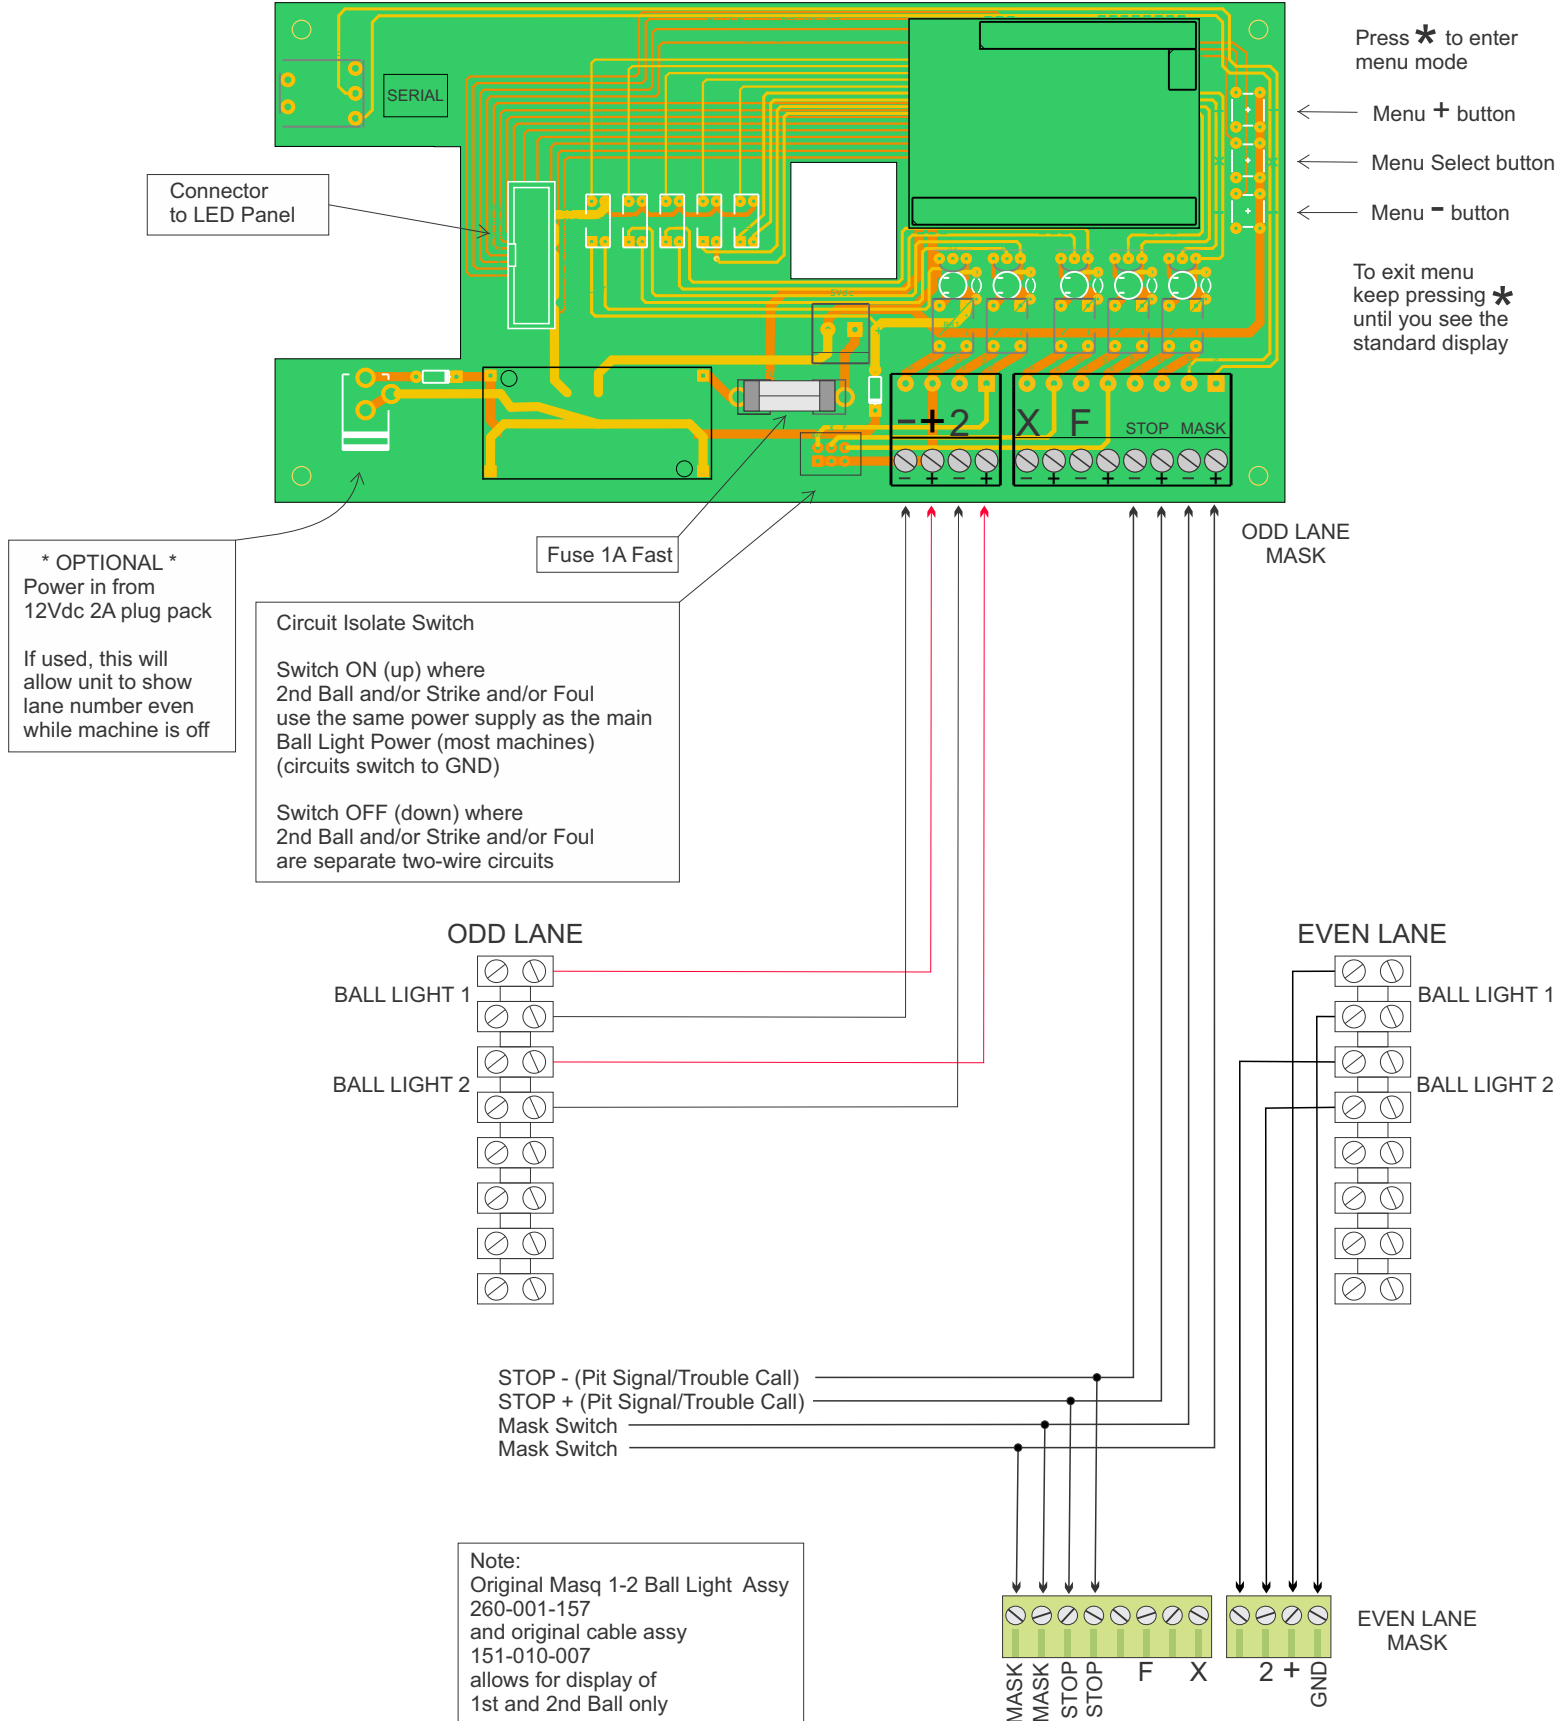

or

Other XLi and XLi Edge
 Are set up to do only 1st Ball and 2nd Ball
 260-001-157 Masq 1-2 Ball Light Assy
 088-000-197 Cable Assy
